- English (Fluent)
- Urdu (Native)

Jan 2021 - Feb 2023

Self Employed | Freelancer

Front End Developer

- Developed responsive, user-friendly interfaces using HTML, CSS, JavaScript, and modern frameworks.
- Improved site performance through code optimization, caching, and best front-end practices.
- Collaborated with clients to deliver custom features, updates, and ongoing maintenance.

PROJECTS

Tour Website - Tour Services March 2021

Key responsibilities:

Developed a fully responsive tour and travel website using HTML, CSS, JavaScript, and Bootstrap, focusing on delivering an engaging user experience with optimized layouts, interactive components, and smooth navigation.

Ensured mobile compatibility, performance optimization, and clean UI/UX implementation throughout the project.

Key Features:

- Fully responsive multi-page layout optimized for mobile and desktop.
- Interactive sections, including tour packages, gallery, and contact forms.
- Smooth navigation with dynamic UI elements such as carousels and modals.
- Clean, modern design using Bootstrap components and custom styling.
- Fast-loading pages with optimized images and lightweight scripts.

Skills:

- HTML5, CSS3, JavaScript (ES6+)
- Bootstrap 4/5 (Grid, Components, Responsive Design)
- UI/UX implementation and front-end optimization
- Cross-browser compatibility and mobile-first development
- Version control (Git) and debugging tools

Restaurants Website - Menu Services Sep 2021

Key responsibilities:

Developed a fully responsive restaurant website using HTML, CSS, JavaScript, and Bootstrap, focusing on delivering an attractive, user-friendly interface with fast performance.

Implemented interactive menu sections, reservation/contact features, and optimized UI components to enhance the customer browsing experience.

Ensured cross-browser compatibility, mobile responsiveness, and seamless functionality throughout the site.

Key Features:

- Fully responsive multi-page design optimized for mobile, tablet, and desktop.
- Interactive restaurant menu with categorized dishes and pricing.
- Modern home page hero section with carousel/slider for promotions.
- Table reservation/contact form with email integration using MailTrap SMTP.
- WhatsApp contact integration for quick inquiries and direct messaging.
- Smooth UI interactions using Bootstrap components and custom JavaScript.
- Optimized images and lightweight scripts for fast page loading.

Skills:

- HTML5, CSS3, JavaScript
- Bootstrap 5 (Grid System, Components, Responsive Design)
- UI/UX implementation and front-end performance optimization
- Integration of third-party services (MailTrap SMTP, WhatsApp API link)
- Cross-browser compatibility and mobile-first development
- Debugging tools and version control (Git)

ECommerce Store - Product Services Oct 2022

Key responsibilities:

Developed and customized a fully functional Shopify store, focusing on a seamless shopping experience, modern UI, and mobile responsiveness. Implemented theme customization, product setup, navigation structure, and essential Shopify features to improve user engagement and conversion. Ensured smooth store performance, optimized visuals, and integrated necessary apps to enhance functionality.

Key Features:

- Custom-designed Shopify theme with responsive layout.
- Organized product catalog with collections, variants, and optimized product pages.
- Integrated secure checkout, cart functionality, and payment gateways.
- Added essential Shopify apps for reviews, analytics, and marketing.
- SEO-friendly structure with optimized images and metadata.
- Clean navigation and user-friendly interface for improved conversion.

Skills:

- Shopify Theme Customization (Liquid, HTML, CSS, JavaScript)
- Product & Collection Management
- App Integration and Store Configuration
- SEO Setup and Performance Optimization

Record Management System - Game Book Aug 2025 - Dec 2025

Key responsibilities:

Developed a comprehensive Record Management System (RMS) for Game Book using HTML, CSS, JS, Bootstrap 5, PHP, Laravel (MVC, Eloquent ORM), and MySQL, deployed on Hpanel (Hostinger). Implemented a full-featured backend with multi-role authentication, OTP-based login, and secure CRUD operations for customers, games, payments, and transactions. Designed dynamic dashboards and reporting modules for agents' daily/monthly reports, salary management, expenses, and financial tracking. Integrated Facebook pages and payment methods, ensuring smooth interaction and accurate record keeping across the system.

Key Features:

- CRUD Operations: Customers, Games, Payment Methods with account names, Deposits, Redeems, CashOuts.
- User Authentication: Multi-role login system with OTP verification.
- Data Management: Hide/Unhide sensitive data, All-time transactions, Expenses records.
- Reporting & Analytics: Agents' daily/monthly reports, salary management dashboards.
- Third-Party Integration: Facebook pages and payment systems integration.
- Deployment: Hpanel (Hostinger) deployment with secure database management.
- UI/UX: Responsive design using Bootstrap 5 with dynamic dashboards and interactive UI elements.

Skills:

- HTML5, CSS3, JavaScript, Bootstrap 5
- PHP, Laravel (MVC, Eloquent ORM, Blade Templates)
- MySQL database design and optimization
- User authentication, role management, and OTP integration
- Reporting systems, CRUD operations, and data visualization
- Hosting and deployment on Hpanel (Hostinger)
- UI/UX design, responsive layouts, and debugging

Inventory Management System By Product With Category - GYM equipment's Oct 2022

Key responsibilities:

Developed a complete Sales and Inventory Management System for Max Fitness using HTML, CSS, JavaScript, Bootstrap 5, PHP, Laravel (MVC, Eloquent ORM), and MySQL. Built a structured backend with role-based authentication (Admin/Worker) and secure CRUD operations for products, categories, customers, shops, suppliers, invoices, and transactions. Designed dynamic invoice generation with PDF export, cart management system, and automated remaining balance calculations. Implemented transaction history tracking for shops and suppliers with editable payment updates via modal forms. Created an interactive dashboard to monitor sales, stock levels, and financial summaries. Ensured responsive UI design and smooth user experience across all modules.

Key Features:

- Complete CRUD System: Products, Categories, Customers, Shops, Suppliers, and Invoices management.
- Role-Based Authentication: Admin and Worker access control with secure session handling.
- Invoice & Billing Module: Dynamic invoice creation with PDF generation and automatic subtotal/paid/remaining calculations.
- Cart System: Add, update, and clear cart functionality with real-time total calculations.
- Transaction Management: Shop and supplier transaction history with editable remaining payments and updated records tracking.
- Inventory Monitoring: Stock management with remaining items tracking and a dashboard overview.
- Responsive UI/UX: Professional invoice-style design using Bootstrap 5 with clean dashboards and interactive elements.

Skills:

- HTML5, CSS3, JavaScript
- Bootstrap 5 (Responsive UI Design)
- PHP, Laravel (MVC Architecture, Eloquent ORM, Blade Templates)
- MySQL Database Design & Relationships
- Role-Based Authentication & Session Management
- Invoice System Development & PDF Generation
- CRUD Operations & Data Management
- Dashboard Design & Financial Reporting
- Debugging, Optimization & Deployment
